PROFESSIONAL SUMMARY

Frontend Developer with experience building responsive, user-focused web applications using **JavaScript**, **TypeScript**, **React**, **Next.js**, **Tailwind CSS**, and modern frontend development tools. Experienced in developing e-commerce platforms, service marketplaces, and booking systems, with a strong focus on creating reusable components, responsive interfaces, and seamless user experiences. Skilled in collaborating with remote development teams, integrating APIs, and delivering production-ready applications.

Technical Skills

Languages

Basic to intermediate knowledge of **JavaScript** for building web and mobile interfaces. Familiar with **HTML**, **CSS**, and **JavaScript fundamentals** for frontend development. Basic understanding of backend development using **Node.js**.

Frameworks & Libraries

Skilled in modern frontend, mobile, and backend development tools:

- **Nextjs and Vite** for building fast, component-based web applications with optimized performance and routing capabilities.
- **Tailwind CSS** for responsive, utility-first UI development and modern interface styling.
- **React Native (Expo)** for developing cross-platform mobile applications for Android and iOS.
- **Node.js** for building lightweight backend services and API integrations.
- **Sanity CMS** for managing and delivering structured content in web applications.

Databases

- **MongoDB** for performing **CRUD operations and integrating database services with web applications**.

Cloud & Deployment

- **Vercel, Netlify, and Render** for deployment of frontend and full-stack applications.
- Basic experience configuring environment variables and hosting web applications online.
- Familiar with continuous deployment workflows for personal projects.

Architecture & Design

- Worked with **component-based architecture** using React.
- Applied responsive and mobile-first design principles using Tailwind CSS.
- Basic understanding of organizing frontend project structures for scalability.

Testing & Quality Assurance

- Used **Postman** for API testing and validation
- Debugged frontend applications during development.

Project & Collaboration Tools

- **Git & GitHub** for version control and project collaboration.

Frontend Concepts

- Responsive Design
 - Mobile-First Development
 - Component-Based Architecture
 - UI/UX Best Practices
 - Performance Optimization
-

PROFESSIONAL EXPERIENCE

Frontend Developer Intern | RUUM AFRICA, Remote NOV 2025 - Present

- Led frontend development for Shop54Ruum, an e-commerce marketplace for African artwork and merchandise, delivering approximately 95% of the user-facing application.
- Built responsive product catalog, product detail, and shopping experience pages using Next.js, TypeScript, and Tailwind CSS.
- Integrated Sanity CMS to support dynamic content and product management workflows.
- Developed reusable UI components that improved consistency and maintainability across the platform.
- Built the frontend for 54Grid, a platform that enables businesses and individuals to request website development services.
- Developed responsive pages and reusable components using Next.js and modern frontend development practices.
- Contributed production features to the main 54Ruum website, including a Privacy Policy page, Cookie Consent Banner, and an interactive image gallery with modal functionality.
- Collaborated with a team of developers using Git-based workflows, code reviews, and remote development practices.
- Applied clean code principles, component reusability, and responsive design techniques across multiple projects.

Web Development Instructor Intern | GMTSoftware, Abuja MAY 2025 – SEP 2025

- Delivered practical training sessions covering HTML, CSS, Tailwind CSS, JavaScript and React.
 - Introduced students to modern frontend development concepts including responsive design and component-based architecture.
 - Guided learners through hands-on projects to build functional web applications.
 - Assisted students in debugging code and strengthening problem-solving skills.
 - Supported project-based learning environments that encouraged collaboration and practical application of technical skills.
-

FEATURED PROJECTS

Shop54Ruum – African Art & Merchandise Marketplace Technologies: React, TypeScript, Tailwind CSS, Sanity CMS

- Led frontend development for a production e-commerce platform supporting African artists and creators.
- Built responsive shopping experiences, product pages, and reusable UI components.
- Integrated dynamic content management through Sanity CMS.
- Collaborated with a development team to deliver scalable and maintainable frontend solutions.

Live Demo: <https://54shop.vercel.app/>

54Grid – Website Development Services Platform
Technologies: Next.js, Tailwind CSS

- Built the frontend interface for a platform where businesses can request website development services.
- Developed responsive pages and reusable components using Next.js.
- Implemented mobile-first layouts to ensure seamless experiences across devices.

Live Demo: <https://grid.54ruum.com/>

MQ Flight Booking System
Technologies: JavaScript, React, Node.js, MongoDB, Paystack, Nodemailer

- Developed a full-stack flight booking application from concept to deployment.
- Implemented secure user authentication and account management functionality.
- Integrated Paystack payment processing for booking transactions.
- Built backend APIs using Node.js and MongoDB.
- Implemented automated email notifications using Nodemailer for booking confirmations.

Live Demo: <https://mq-flight-booking-app.vercel.app/>

Delish – Food Ordering & Restaurant Reservation Platform
Technologies: JavaScript, React, Tailwind CSS, Paystack

- Designed and developed a restaurant web application from concept to deployment.
- Implemented user registration and login functionality.
- Built food ordering and table reservation systems.
- Integrated Paystack test payments for online transactions.
- Created a blog section for content publishing and customer engagement.

Live Demo: <https://delish-five.vercel.app/>

ZedTunes – Music Streaming Web Application
Technologies: JavaScript, React

- Built a music streaming web application with media playback functionality.
- Developed responsive user interfaces focused on usability and performance.
- Implemented interactive frontend features to improve user engagement.

Live Demo: <https://zedtunes.netlify.app/>

EDUCATION

Federal University of Technology Minna, Niger State
Bachelor of Technology (B.Tech), Agriculture
2024
